

# **15IT304J – WEB PROGRAMMING LAB**

**SEMESTER - VI**

**Name : VENKAT CHANDRA**

**Register No. : RA171100810251**

**Class : III B.Tech. IT**

**2020 - 2021**

**FACULTY OF ENGINEERING AND TECHNOLOGY  
SRM INSTITUTE OF SCIENCE AND TECHNOLOGY**

**(Under Section 3 of UGC Act, 1956)**

**S.R.M. NAGAR, KATTANKULATHUR – 603 203  
KANCHEEPURAM DISTRICT**

## **SRM INSTITUTE OF SCIENCE AND TECHNOLOGY**

(Under Section 3 of UGC Act, 1956)

**S.R.M. NAGAR, KATTANKULATHUR – 603 203  
KANCHEEPURAM DISTRICT**

### **BONAFIDE CERTIFICATE**

**Register No.: RA1711008010251**

*Certified to be the bonafide record of work done  
by VENKAT CHANDRA of INFORMATION TECHNOLOGY B.Tech.  
Degree course in the Practical\_in SRM Institute of Science and  
Technology, Kattankulathur during the academic year 2020*

**Lab Incharge : T.KARTHIK**

**Date:**

**Head of the Department  
Dr.G.Vadivu**

*Submitted for University Examination held on \_\_\_\_\_ at  
SRM Institute of Science and Technology, Kattankulathur.*

**Date:**

**Internal Examiner I**

**Internal Examiner II**

## INDEX

Ex. No.	Date	Name of the Experiment	Page No.	Mark	Signature
0		Installation, Environment Preliminaries			
1		Creating web pages using HTML5 Semantic and Structural Elements			
2		Design the web pages using Cascading Style Sheet (CSS 3.0)			
3		Design dynamic web pages with validation using JavaScript			
4		i) Creating mysql database and tables in <i>phpmyadmin</i> ii) Database Connectivity using PHP			
5		Creating web pages with menu and Navigation			
6		Implementing business logic			
7		Implementing session and cookies in the web pages			
8		Hosting the website			
9		Simple applications using JSP and Servlets			
10		Simple applications using AJAX			
11		Simple application for accessing the data using XML			
12		Application for web services			

## Shneiderman's 8 Golden Rules of Interface Design

<b>1. Strive for consistency</b>	Is the style of this element maintained across your site/app? Is this content placed in the correct location according to the site hierarchy? Does this follow the conventions for your chosen platform? How can you make your designs more consistent?
<b>2. Enable frequent users to use shortcuts</b>	Are there shortcuts available for your more experienced users? Who is this product designed for? Will there be a need to consider experienced users? How can you make it easier and quicker for experienced users?
<b>3. Offer informative feedback</b>	Does the user know where they are at in the process? Does the user know what they have done after performing this action? How are you communicating this feedback to your user?
<b>4. Design dialogue to yield closure</b>	Does the user have to do any guessing here? Is it clear and obvious enough for your intended audience? Are there any next steps for the user? How are you communicating the system status with the user?
<b>5. Offer simple error handling</b>	How do you handle errors? Is the error message clear and helpful? Is the error avoidable in the first place? If the user does make an error, how easy is it for them to fix it?
<b>6. Permit easy reversal of actions</b>	How easy is it to undo or redo an action? Do users need to reverse their actions? If so, how can you make it easy for them to do so?
<b>7. Support internal locus of control</b>	Will the user feel in control at this specific touch point in your app? Will they be surprised in an unpleasant manner? Does the site feel easily navigable? Does the user feel safe and in control? How can you make the user feel more safe and in control?
<b>8. Reduce short-term memory load</b>	Are there enough visual cues here for the user to find the functionality or item? Do they have to remember things to understand what's going on? How can you help the user's memory?

**Rubrics for Grading 15IT304J – Web Programming Laboratory**

Experiment Component	Max. Marks	Grading Rubrics		
Layout Design	2	Layout and Design, focusing alignment of content and elements in web page (demonstrates good clarity in understanding the problem statement). To Maintain the Coding Standards Commenting, Naming conventions, Portability and Creativity in design is taken care off. <b>[2 marks]</b>	Layout and Design are implemented, but lack of clarity in alignment of content to solve the given problem and lack of creativity in design (demonstrates less clarity in understanding the problem statement) and lack of coding standards. Correctness of layout design in web page is taken care off. <b>[1 mark]</b>	
Business Logic	3	Completeness of code, consistent in maintaining coding standards and best practices, usage of existing skills in new ways/learns new skills to solve the experimental problem. <b>[3 marks]</b>	Completeness of code, inconsistent in maintaining coding standards, lacks clarity in modularity, uses existing skills to solve the experimental problem. <b>[2 marks]</b>	Completeness of code, inconsistent in maintaining coding standards, lacks clarity in modularity, uses existing skills to partially solve the experimental problem. <b>[1 mark]</b>
Web Page Deployment	3	Web page is free of errors and web page design is well formatted. Demonstrates Excellent problem solving and creativity skills. <b>[3 marks]</b>	Web page is free of errors and web page design is not properly formatted. Demonstrates a clear understanding of the concepts relevant to the experiment. <b>[2 marks]</b>	Web page contains few logical errors and web page design is not formatted. Demonstrates partial understanding of the concepts relevant to the experiment. <b>[1 mark]</b>
Web page Testing	2	Web page is tested using better design and creativity and works with logical requirement <b>[2 marks]</b>	Web page works only with logical requirement and lacks good design and creativity <b>[1 mark]</b>

## SIMPLE APPLICATIONS USING SERVLETS

Date:

Aim:

To create a simple application using servlets.

The screenshot shows a web browser window with the URL `File | C:/xampp/htdocs/web/reg.html`. The page has a light blue background with a white box on the left containing the NAPIER MEDCARE logo. The main content area is titled "Signup here" and contains a registration form with the following fields and options:

- First name :
- Last name :
- category : ☐ Doctor ☐ Patient
- Email :
- User name :
- Password :
- Gender : ☐ Male ☐ Female

The screenshot shows the Eclipse IDE interface with a project named "Form" and a file named "FormInput.html". The form is titled "REGISTRATION FORM" and contains the following fields and options:

- NAME :
- EMAIL ID :
- PASSWORD :
- CONFIRM PASSWORD :
- GENDER : ☒ MALE ☐ FEMALE
- DATE OF BIRTH :
- MOBILE NO :
- Would you visit us again: ☒ Yes ☐ No ☐ Maybe
- Service you prefer more from us ?
- COMMENTS :

## Code:

### 1. FormInput.java

```
import java.io.*;
import java.sql.*;
import javax.servlet.ServletException;
import javax.servlet.http.*;

public class FormInput extends HttpServlet {
public void doPost(HttpServletRequest request, HttpServletResponse response)
throws ServletException, IOException {

response.setContentType("text/html")
; PrintWriter out =
response.getWriter();

String n=request.getParameter("name");
String p=request.getParameter("email");
String e=request.getParameter("pswd");
String c=request.getParameter("cpswd");
String d=request.getParameter("gender");
String f=request.getParameter("dob");
String g=request.getParameter("mobno");
String h=request.getParameter("visit");
String
y=request.getParameter("activity");
String
j=request.getParameter("comment");

out.println(n);
out.println(p);
out.println(e);
out.println(c);
out.println(d);
out.println(f);
out.println(g);
out.println(h);
out.println(y);
out.println(j);
out.close();
```

}

}

## 2. FormInput.html

```
<!DOCTYPE html>
<html>
<head>
  <style>
    table,td{
      padding : 10px;
      background-color: #e6e6e6;
    }
  </style>
  <script src="reg form validation.js"></script>
</head>
<body>
<center>
  <form action="FormInput" method = "POST">
    <table style="border :1px solid">
<tr>
<center>
<th colspan="2">REGISTRATION FORM</th></center>

### Rubrics for Grading 15IT304J – Web Programming Laboratory

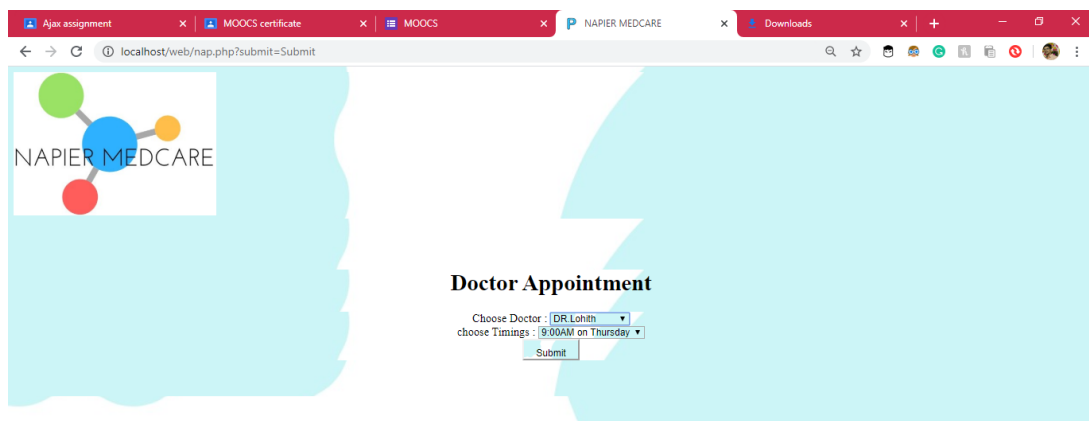

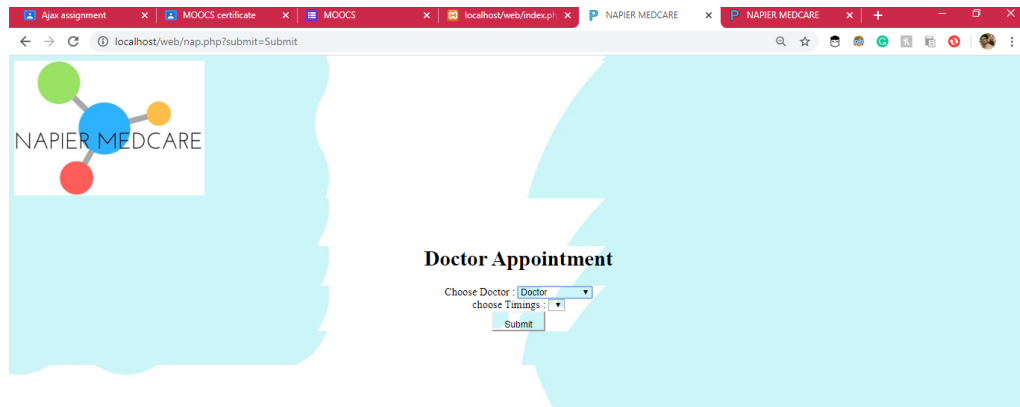

Experiment Component	Max. Marks	Grading Rubrics		
Layout Design	2	Layout and Design, focusing alignment of content and elements in web page (demonstrates good clarity in understanding the problem statement). To Maintain the Coding Standards Commenting, Naming conventions, Portability and Creativity in design is taken care off. <b>[2 marks]</b>	Layout and Design are implemented, but lack of clarity in alignment of content to solve the given problem and lack of creativity in design (demonstrates less clarity in understanding the problem statement) and lack of coding standards. Correctness of layout design in web page is taken care off. <b>[1 mark]</b>	
Business Logic	3	Completeness of code, consistent in maintaining coding standards and best practices, usage of existing skills in new ways/learns new skills to solve the experimental problem. <b>[3 marks]</b>	Completeness of code, inconsistent in maintaining coding standards, lacks clarity in modularity, uses existing skills to solve the experimental problem. <b>[2 marks]</b>	Completeness of code, inconsistent in maintaining coding standards, lacks clarity in modularity, uses existing skills to partially solve the experimental problem. <b>[1 mark]</b>
Web Page Deployment	3	Web page is free of errors and web page design is well formatted. Demonstrates Excellent problem solving and creativity skills. <b>[3 marks]</b>	Web page is free of errors and web page design is not properly formatted. Demonstrates a clear understanding of the concepts relevant to the experiment. <b>[2 marks]</b>	Web page contains few logical errors and web page design is not formatted. Demonstrates partial understanding of the concepts relevant to the experiment. <b>[1 mark]</b>
Web page Testing	2	Web page is tested using better design and creativity and works with logical requirement <b>[2 marks]</b>	Web page works only with logical requirement and lacks good design and creativity <b>[1 mark]</b>	

Date:

Aim: **To create an application for web services**

## TemperatureConverter Web Service Tester

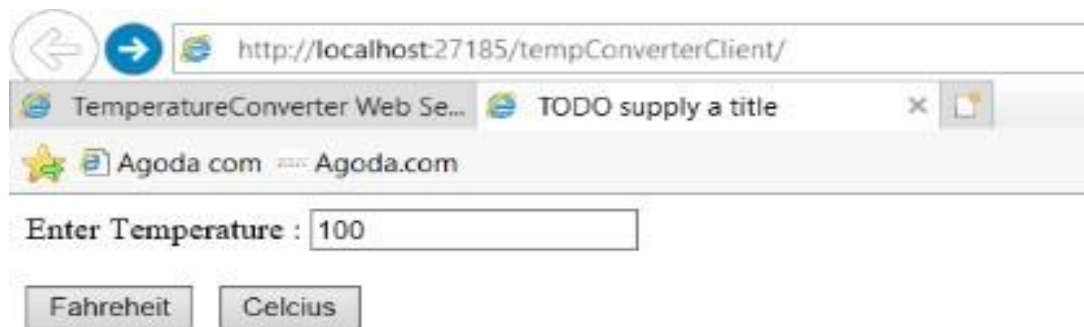

This form will allow you to test your web service implementation ([WSDL File](#))

To invoke an operation, fill the method parameter(s) input boxes and click on the button labeled with the method name.

### Methods :

public abstract float com.unique.TemperatureConverter.fahToCelcius(float)  
 fahToCelcius (  )

public abstract float com.unique.TemperatureConverter.celciusToFah(float)  
 celciusToFah (  )

Temperature in Fahrenheit : 212.0

Temperature in Celcius :37.77778

### **Code:**

#### **TemperatureConverter.java**

```
package com.unique;
import
javax.jws.WebService;
import
javax.jws.WebMethod;
import
javax.jws.WebParam;
/**
 *
 * @author jasprit
 */
@WebService(serviceName =
"TemperatureConverter") public class
TemperatureConverter {
/**
 * Web service operation
 */
@WebMethod(operationName = "FahtoCelcius")
public float FahtoCelcius(@WebParam(name = "temp") float
temp) { float result=(temp-32)*5/9;
return result;
}
/**
 * Web service operation
 */
@WebMethod(operationName = "CelciusTofah")
public float CelciusTofah(@WebParam(name = "temp") float
temp) { float result=temp*9/5+32;
return result;
}
}
```

#### **Temperature.java**

```
import
com.unique.TemperatureConverter_Service;
import java.io.IOException;
import java.io.PrintWriter;
import
javax.servlet.ServletException;
import
javax.servlet.http.HttpServlet;
import
javax.servlet.http.HttpServletRequest;
import
javax.servlet.http.HttpServletResponse;
import javax.xml.ws.WebServiceRef;
```

```

/**
 * @author jasprit
 */
public class Temperature extends HttpServlet {
    @WebServiceRef(wsdlLocation = "WEB-INF/wsdl/TemperatureConverter.wsdl") private
    TemperatureConverter_Service service;
